 - (b) pays the Deposit by a post-dated cheque; or
 - (c) pays the Deposit by cheque which is dishonoured on presentation.

 - (f) the Buyer must pay the CGT Withholding Amount to the ATO in accordance with section 14-200 of the Withholding Law and give the Seller evidence that it has done so within 2 Business Days of settlement occurring.
- (4) For clause 2.5(3) and section 14-215 of the Withholding Law, the market value of the CGT asset is taken to be the Purchase Price less any GST included in the Purchase Price for which the Buyer is entitled to an input tax credit unless:
 - (a) the Property includes items in addition to the Lot and Improvements; and
 - (b) no later than 2 Business Days before the Settlement Date, the Seller gives the Buyer a valuation of the Lot and Improvements prepared by a registered valuer,

- (6) The Buyer warrants that the statements made by the Buyer in the Reference Schedule under GST Withholding Obligations are true and correct.

2.6 Adjustments

- (1) Rent and Outgoings must be apportioned between the parties in accordance with this clause 2.6 and any adjustments paid and received on settlement so that:

 - (b) the Buyer is liable for Outgoings and is entitled to Rent after the Settlement Date.
- (2) Subject to clauses 2.6(3), 2.6(5) and 2.6(17), Outgoings for periods including the Settlement Date must be adjusted:
 - (a) for those paid, on the amount paid;
 - (b) for those assessed but unpaid, on the amount payable (excluding any discount); and

 - (i) on the amount the relevant authority or the Body Corporate advises will be assessed (excluding any discount); or
 - (ii) if no advice on the assessment to be made is available, on the amount of the latest assessment (excluding any discount).
- (3) If there is no separate assessment of rates for the Lot at the Settlement Date and the Local Government informs the Buyer that it will not apportion rates between the Buyer and the Seller, then:
 - (a) the amount of rates to be adjusted is that proportion of the assessment equal to the ratio of the interest schedule lot entitlement of the Lot to the aggregate interest schedule lot entitlement of the Scheme; and

- (b) if an assessment of rates includes charges imposed on a "per lot" basis, then the portion of those charges to be adjusted is the amount assessed divided by the number of lots in that assessment.
- (4) The Seller is liable for land tax assessed on the Lot for the financial year current at the Settlement Date. If land tax is unpaid at the Settlement Date and the Queensland Revenue Office advises that it will issue a final clearance for the Lot on payment of a specified amount, then the Seller irrevocably directs the Buyer to draw a bank cheque for the specified amount from the Balance Purchase Price at settlement and the Buyer must pay it promptly to the Queensland Revenue Office.
- (5) Any Outgoings assessable on the amount of water used must be adjusted on the charges that would be assessed on the total water usage for the assessment period, determined by assuming that the actual rate of usage shown by the meter reading made before settlement continues throughout the assessment period. The Buyer must obtain and pay for the meter reading.
- (6) If any Outgoings are assessed but unpaid at the Settlement Date, then the Seller irrevocably directs the Buyer to draw a bank cheque for the amount payable from the Balance Purchase Price at settlement and pay it promptly to the relevant authority or the Body Corporate, as appropriate. If an amount is deducted under this clause, the relevant Outgoing will be treated as paid at the Settlement Date for the purposes of clause 2.6(2).
- (7) Rent for any rental period ending on or before the Settlement Date belong to the Seller and are not adjusted at settlement.
- (8) Unpaid Rent for the rental period including both the Settlement Date and the following day ("**Current Period**") is not adjusted until it is paid.
- (9) Rent already paid for the Current Period or beyond must be adjusted at settlement.

- (11) Payments under clause 2.6(10) must be made within 14 days after notification by one party to the other but only after any additional payment from a Tenant has been received.
- (12) The Seller is liable for:
 - (a) any Special Contribution for which a levy notice has been issued on or before the Contract Date; and
 - (b) any other Body Corporate Debt (including any penalty or recovery cost resulting from non-payment of a Body Corporate Debt) owing in respect of the Lot at settlement.

What are Zones and Local Plans?

Every property in Queensland is included in a zone, nominated under a Council planning scheme. The zoning of your property will affect what you can do with it and may be different to your neighbours, as their land may be zoned differently.

Each zone allocates land for different types of land uses. The typical zone categories are residential, commercial, industrial, community facilities and services, rural activities, and environmental and recreation areas, however specific zone categories are identified within a Council planning scheme.

The zone guides the type of land use or type of development that may occur on a site. Some zones have precincts which provide more specific information about the types of development intended for particular locations.

Some properties in Queensland are also included within a local plan, nominated under a Council planning scheme. A local plan sets out specific outcomes for a particular area to manage local environmental factors, social and economic factors, along with the management of population growth.

The role of a local plan is to help facilitate economic prosperity, protect character development, provide for open space and facilitate improved infrastructure such as new transport routes.

Things to Consider:

- What does the zoning and local plan mean for the property?
- What land uses are suitable for the applicable zone and/or local plan?
- What is the maximum building height for the applicable zone and/or local plan?
- Can the property be subdivided within the applicable zone and/or local plan?
- If there are conflicting rules between the zone and local plan, which rules take precedence?
- How does this consideration impact the property?

Advice from a town planner is recommended to further understand the zone and/or local plan your property is identified within and understand how this may burden or benefit your property and what it means for future potential development.

NO

Easements have not been identified as burdening or benefiting the property

What is an Easement?

An Easement is a legal right to use a portion of land for a specific purpose. An easement that burdens a portion of land may have restrictions for the landowner and limit the useability of that portion of land.

Easements are generally for the benefit of neighbouring properties for a particular reason (listed below), however there are instances where the benefit of an easement is to a third party which is not a neighbouring property. These are called 'easements in gross' and include third parties such as a Local Government, Queensland Urban Utilities and Energex.

Easements may be required for the following reasons:

- Right of way/access.
- Drainage, sewerage, electricity or other types of infrastructure.
- Encroachments onto another parcel of land.
- Retention of light or air.
- Support of buildings and structures (common walls).
- Shelter (a common property roof).

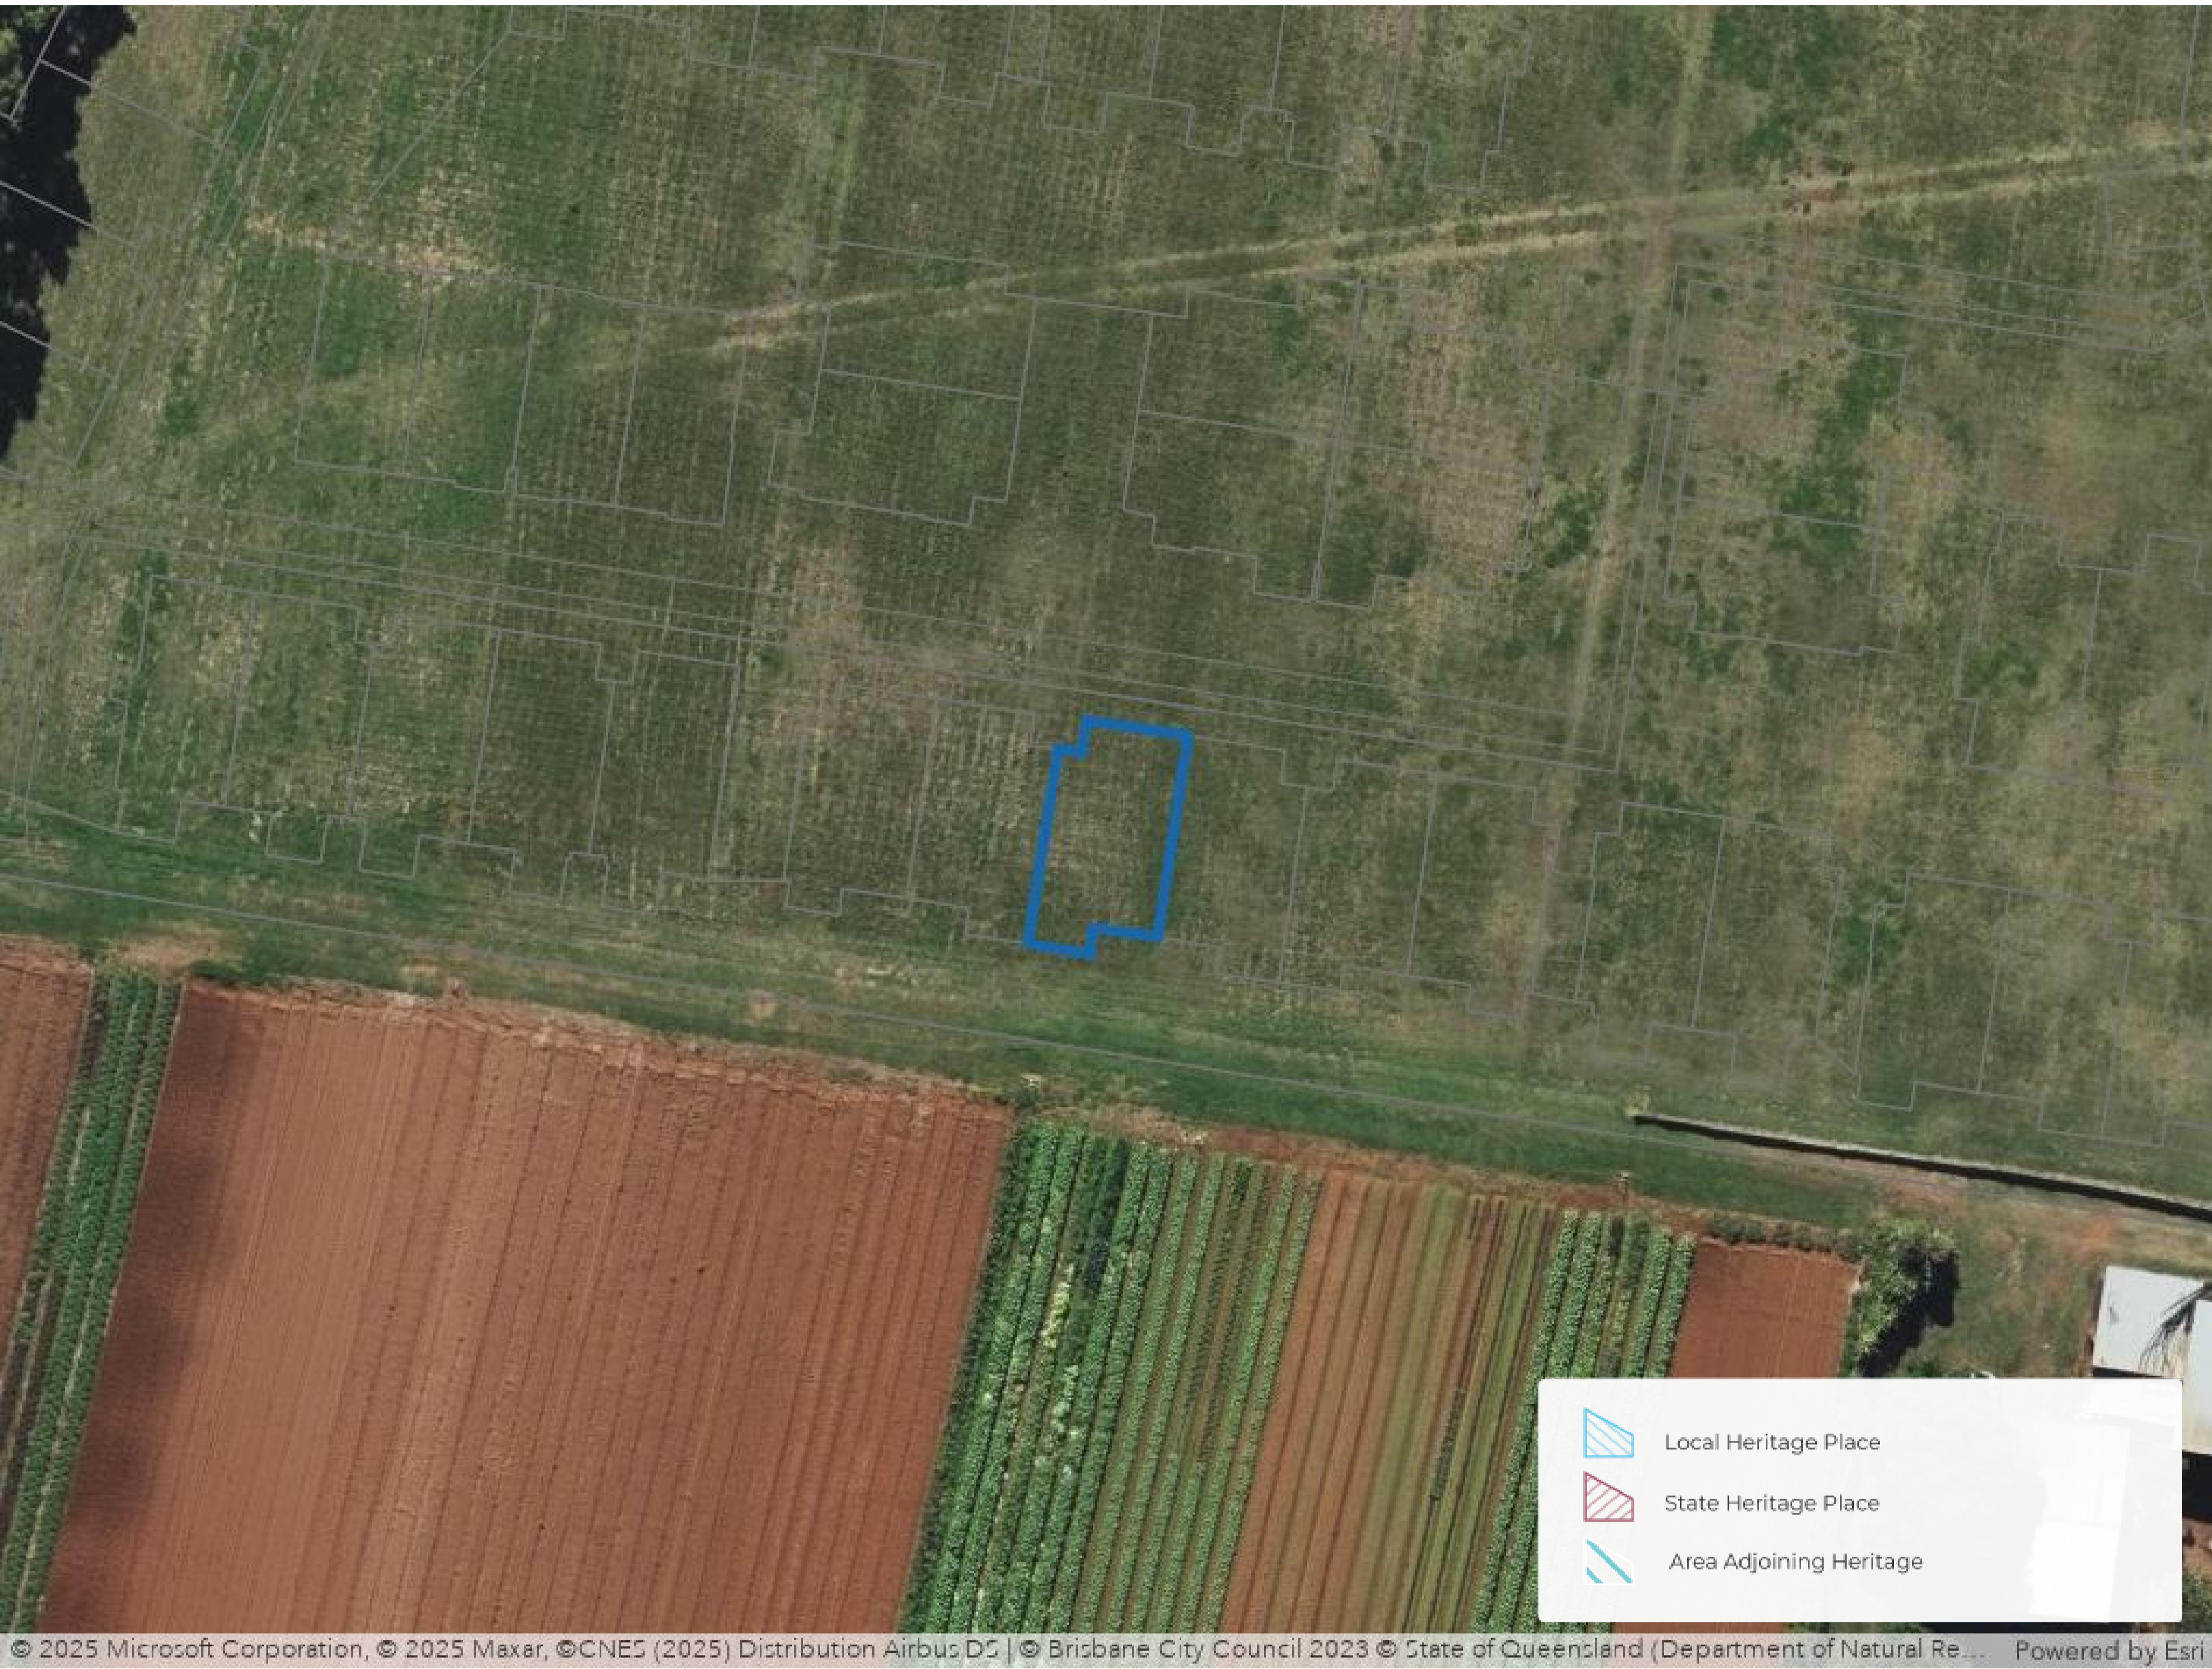

Easements are registered on the land title document and remains on the land title even if the property is sold.

Things to Consider:

- What is the purpose of the easement?
- Where is the easement located on the property?
- Does the easement benefit or burden the property?
- What can be built on the land that the easement encumbers?
- Who is responsible for the maintenance of the land the easement encumbers?
- How does this consideration impact the property?

Advice from a town planner is recommended for a property identified as containing an easement.

Core Koala Habitat Areas represent the best quality koala habitat areas, based on modelling of biophysical measures including climate, suitable vegetation for both food and shelter, and koala sighting records.

Locally Refined Koala Habitat Areas contain locally important mature vegetation for koalas, including some areas previously protected under local government planning schemes.

Koala Broad-Hectare Areas consist of areas with established committed development areas (including declared master planned areas).

NO

The property is not subject to the risk of potential coastal hazards.

What are Coastal Hazards?

Coastal Hazards refers to areas at risk to projected sea level rise and an increase in cyclone intensity, which is determined using the Queensland Governments Coastal Hazard Technical Guide and includes a 0.8m sea level rise by 2100 due to the impact of climate change.

Coastal Management District is a coastal area that is considered to need protection or management, especially with respect to the area's vulnerability to erosion, value in maintaining or enhancing coastal resources or for planning and development of the area.

Storm Tide Inundation refers to storm surges that are caused when extreme storm system and strong onshore winds force sea levels to rise above normal levels. This can also cause erosion of coastlines, which can affect waterfront properties and can cause the inundation of low-lying land on the coast, resulting in damage to the natural and built environments.

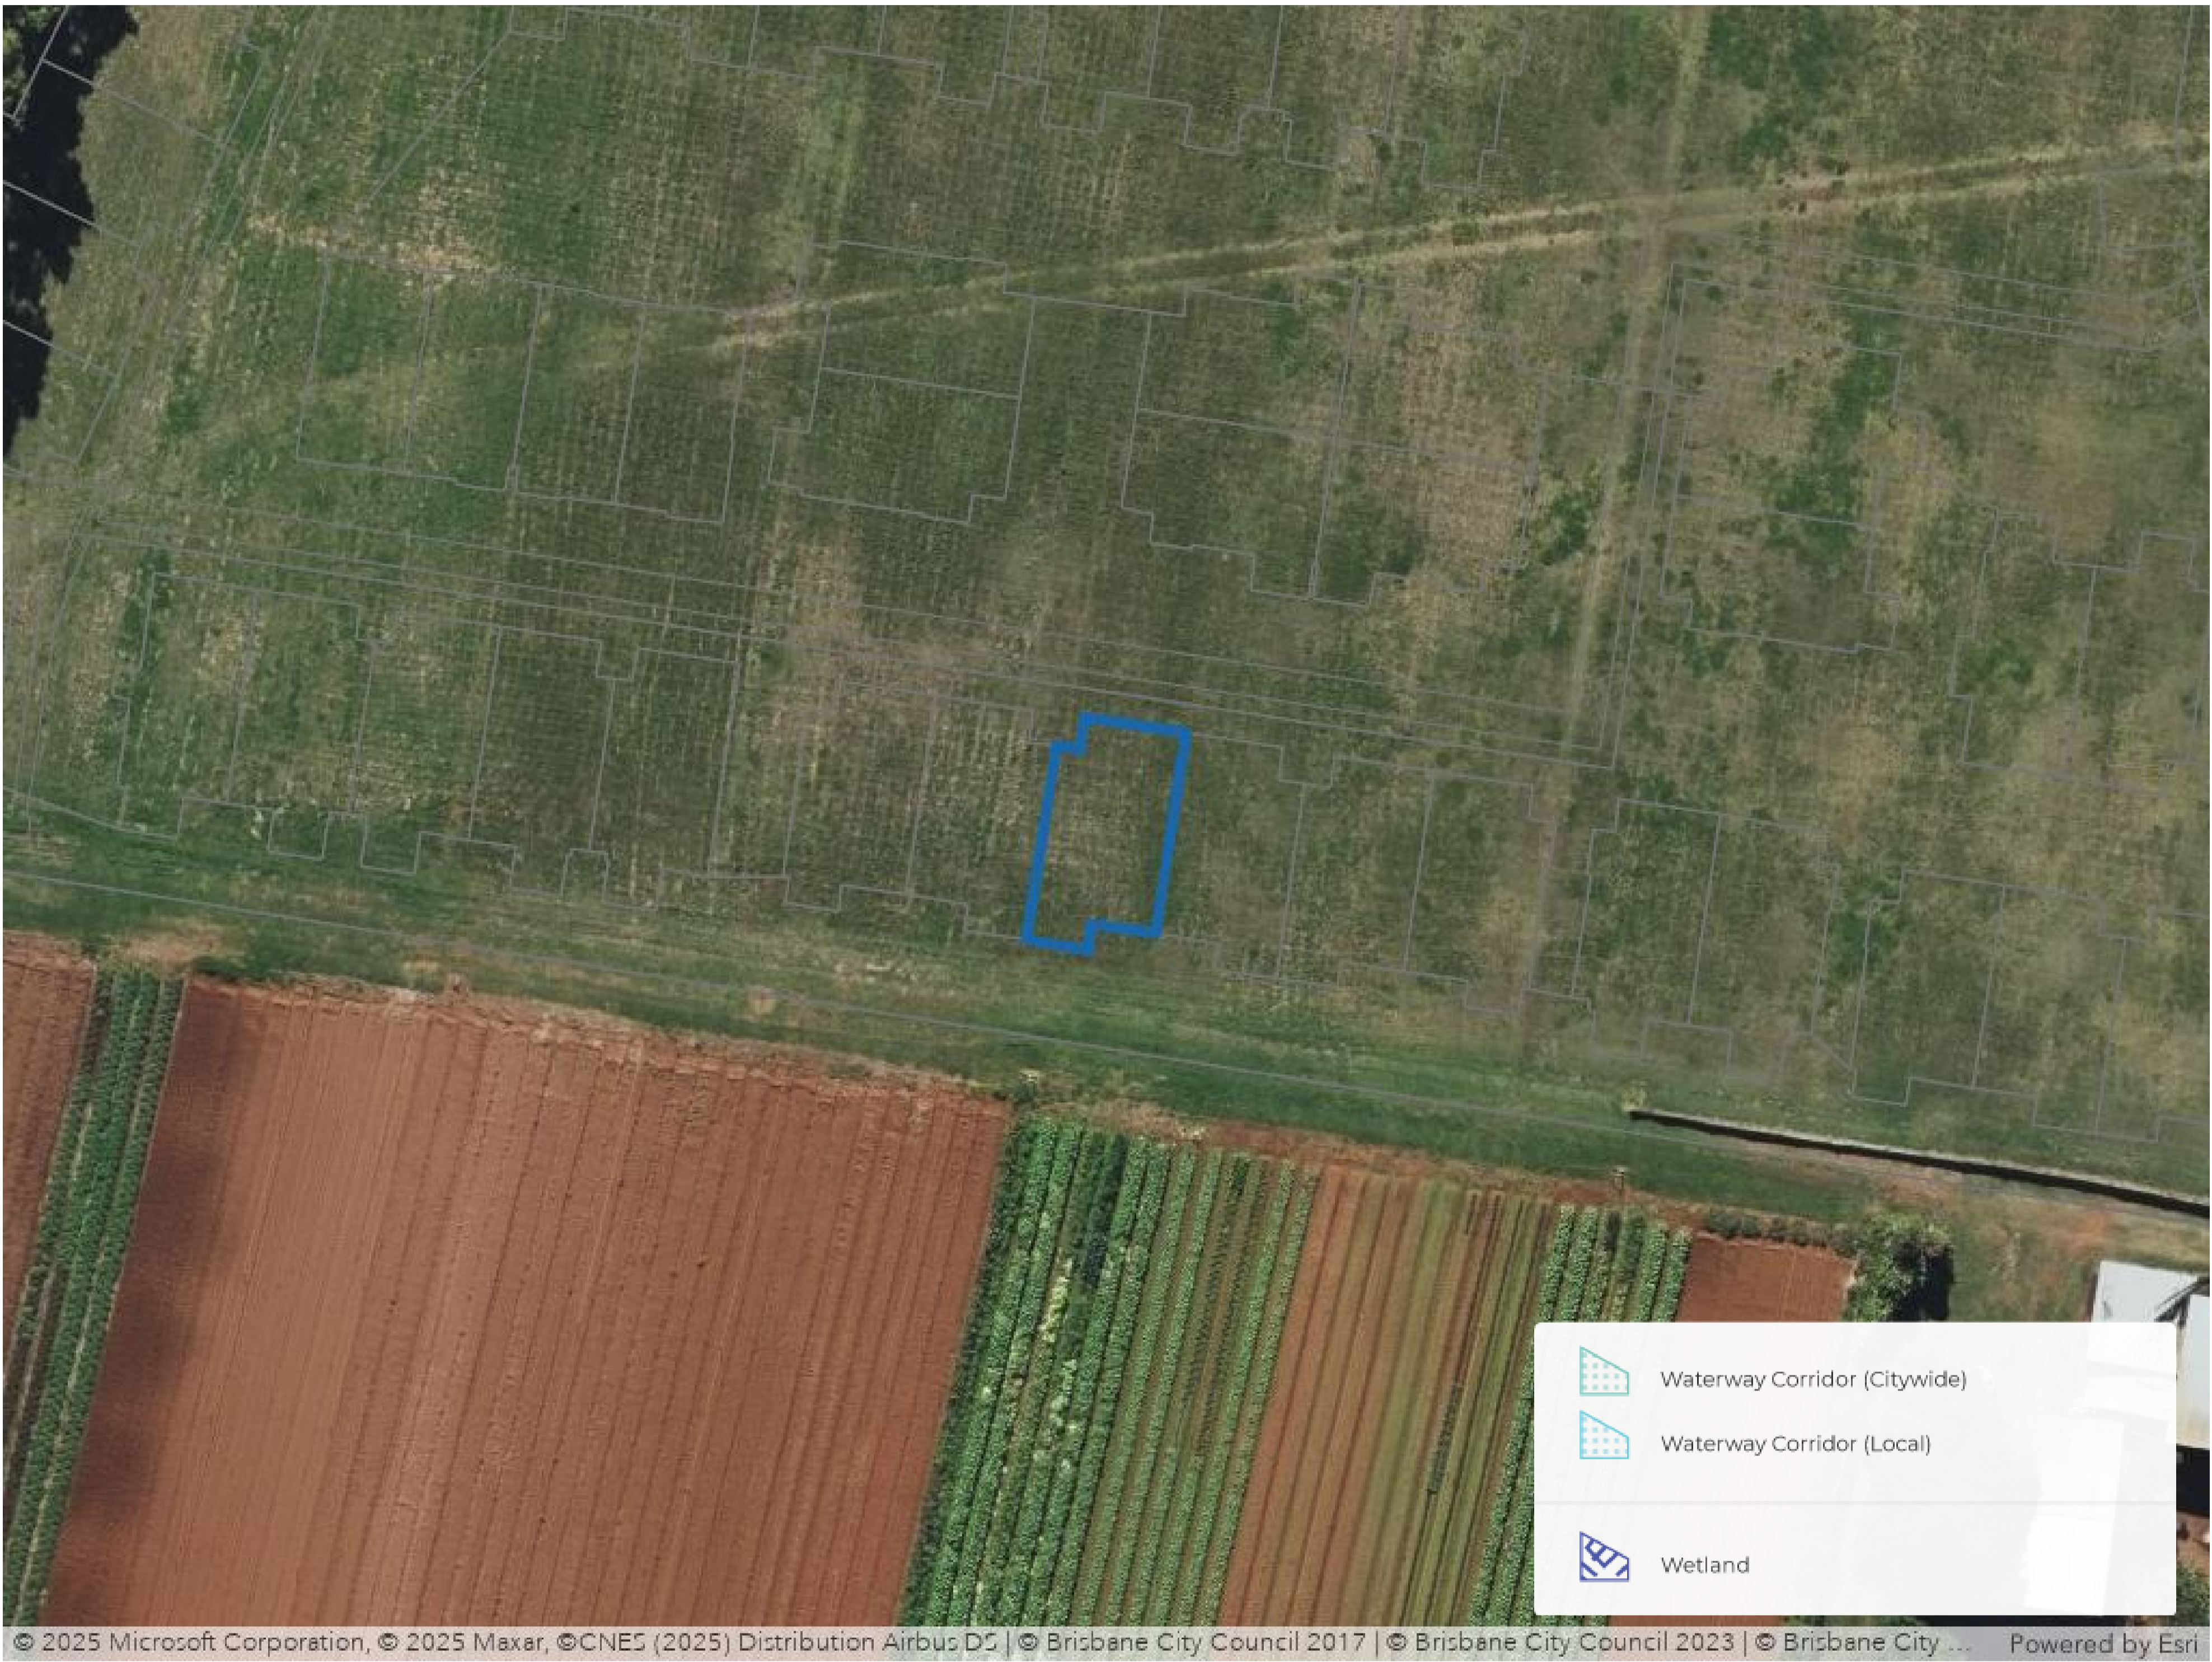

Erosion Prone Areas refers to an area of the coastline that is considered to be vulnerable to coastal erosion and permanent inundation by the sea over a nominated 100-year planning period. Erosion can be a result of storm impact and long-term trends including sediment supply deficit and channel migration and permanent inundation due to sea level rise.

NO

Waterways/wetlands have not been identified on the property.

What are Waterways & Wetlands?

Waterways refer to waterway corridors which facilitate waterway health, flood storage, riparian biodiversity, water quality, wildlife movement and habitat connectivity.

Citywide Waterway Corridor sub-category protects and contributes towards the natural functions of the corridors as connections between the catchment headwaters to the Brisbane River or Moreton Bay, as connectors of public open spaces and key destinations throughout the city and as a series of green networks for terrestrial and aquatic biodiversity.

Local Waterway Corridor sub-category protects and contributes towards the natural functions of the corridor and minimises impervious surfaces.

Wetlands refer to ecosystems that are wet for a period of time and can include swamps, marshes, billabongs, lakes, saltmarshes, mudflats, mangroves, coral reefs, fens and peat bogs.

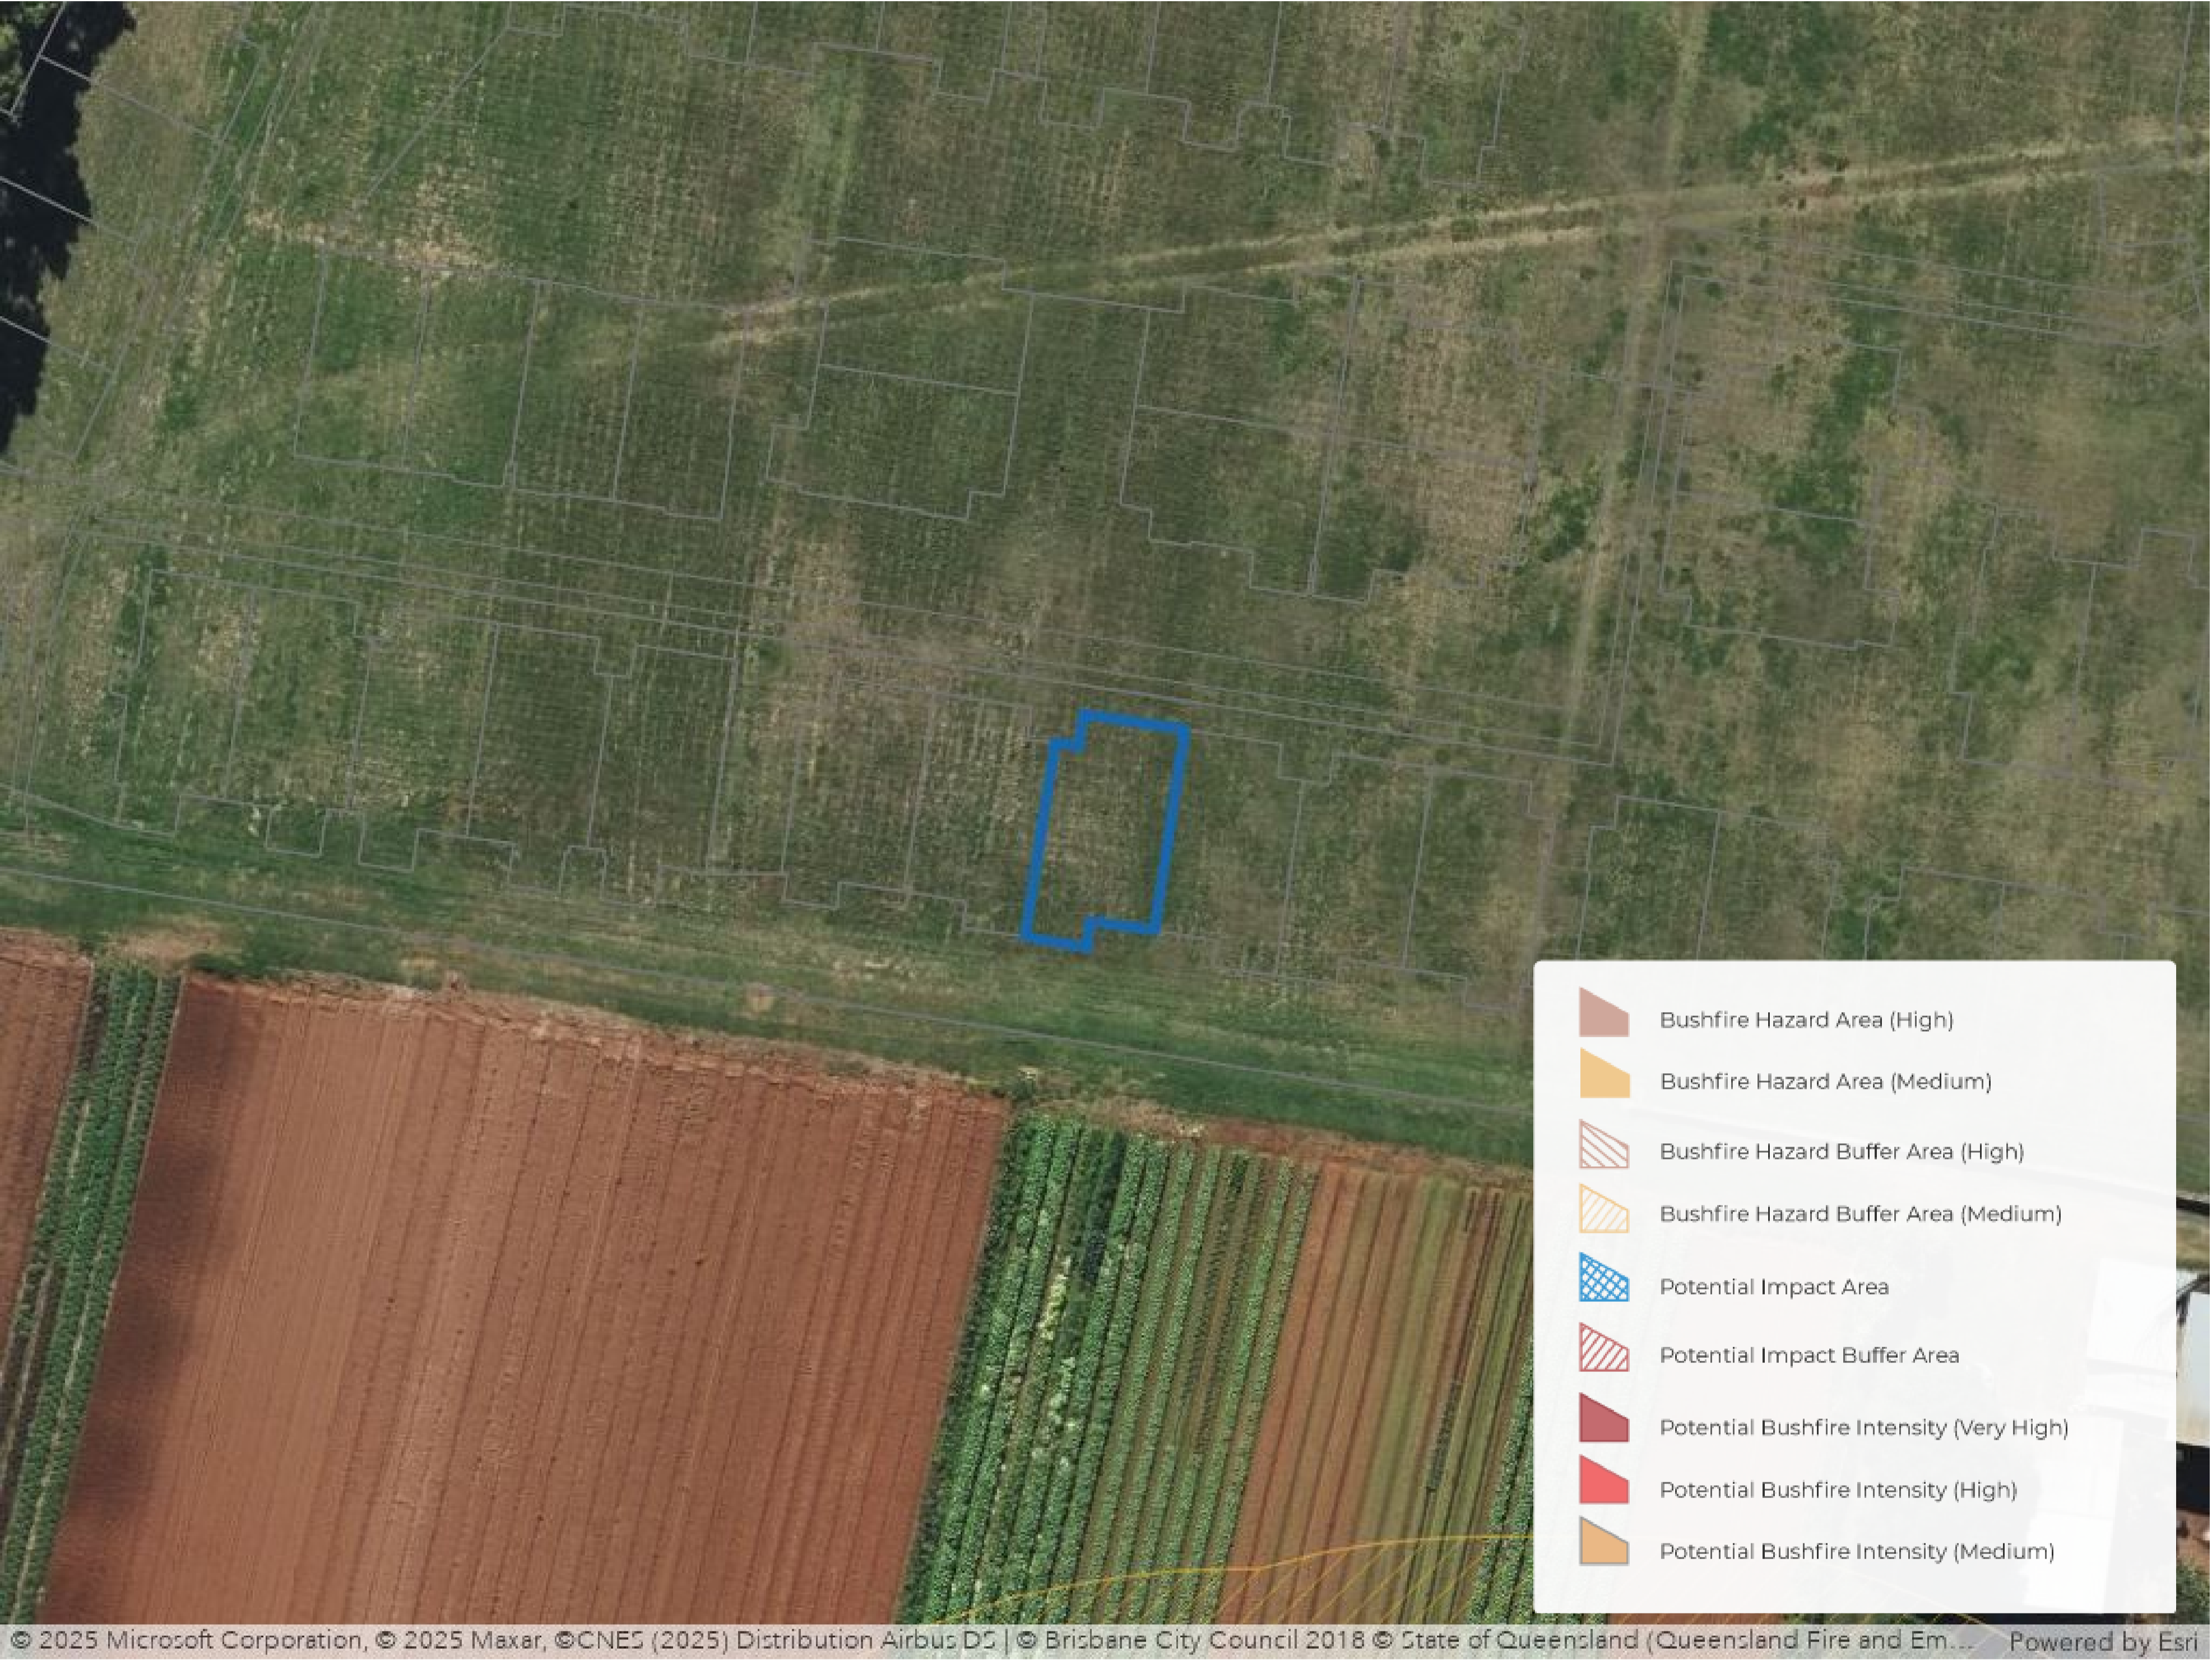

Water in wetlands can be still or flowing and can even be underground (i.e. Atherton Tableland). Wetlands support Queensland's primary industries such as saltmarsh, mangrove and seagrass wetlands provide nurseries for fish and seafood to grow. Some wetlands also provide water for irrigation and farm animals.

Things to Consider:

- Is the property subject to Waterways and/or Wetlands?
- What type of Waterways and/or Wetlands is the property prone to?
- What is the significance of the Waterways and/or Wetlands to the property?
- What can be built in a Waterways and/or Wetlands area?

NO The property is not subject to the risk of potential bushfire.

What is Bushfire Risk?

Bushfire Risk is governed under the State Planning Policy 2017, which provides guidelines to manage the risk of bushfire across Queensland.

Bushfire Risk refers to properties that are susceptible to bushfires. Bushfires are generally caused by high temperatures and longer fire seasons, which increases the likelihood of bushfires and restricts the opportunity for hazard reduction, such as backburning.

Bushfire susceptibility is generally categorised within a bushfire hazard area, potential bushfire intensity and calculated buffer areas utilised for the management and prevention of bushfire risk to properties.

There are various types and levels of bushfire risk that may dictate the design of a building or structure including types of materials used, proximity to a water source and evacuation plans.

Approval is generally required from a Local Government Authority for any buildings or works on land identified with a bushfire risk.

Things to Consider:

- Is the property subject to bushfire risk?
- What category of bushfire risk is the property prone to?
- What is the significance of the bushfire risk to the property?
- What can be built in a bushfire risk area?
- Can the bushfire risk be mitigated through design?
- How does this consideration impact the property?

Advice from a town planner & a bushfire consultant is recommended for a property subject to bushfire.

Steep Land

NO

The property is not identified as steep land and/or possible risk of landslide.

What is Steep Land?

Steep Land refers to steep sloping land and susceptibility to landslide risk. Steep land modelling has been produced by local and state governing authorities to identify land with steep slopes and unstable land occurring when the inherent strength of the soil or weathered rock is too weak, causing landslides. Landslides refer to the movement of a mass of rock or debris down a slope of land.

Steep slopes are generally categorised into risk types utilised for the identification and management of properties with steep land, which may be unsuitable for development.

Buildings or works on land with susceptibility to landslide risk typically require advice from a geotechnical engineer to determine the landslide risk level and what is required to stabilise the land for development.

Approval is generally required from a Local Government Authority for any buildings or works on land with susceptibility to landslide risk.

Things to Consider:

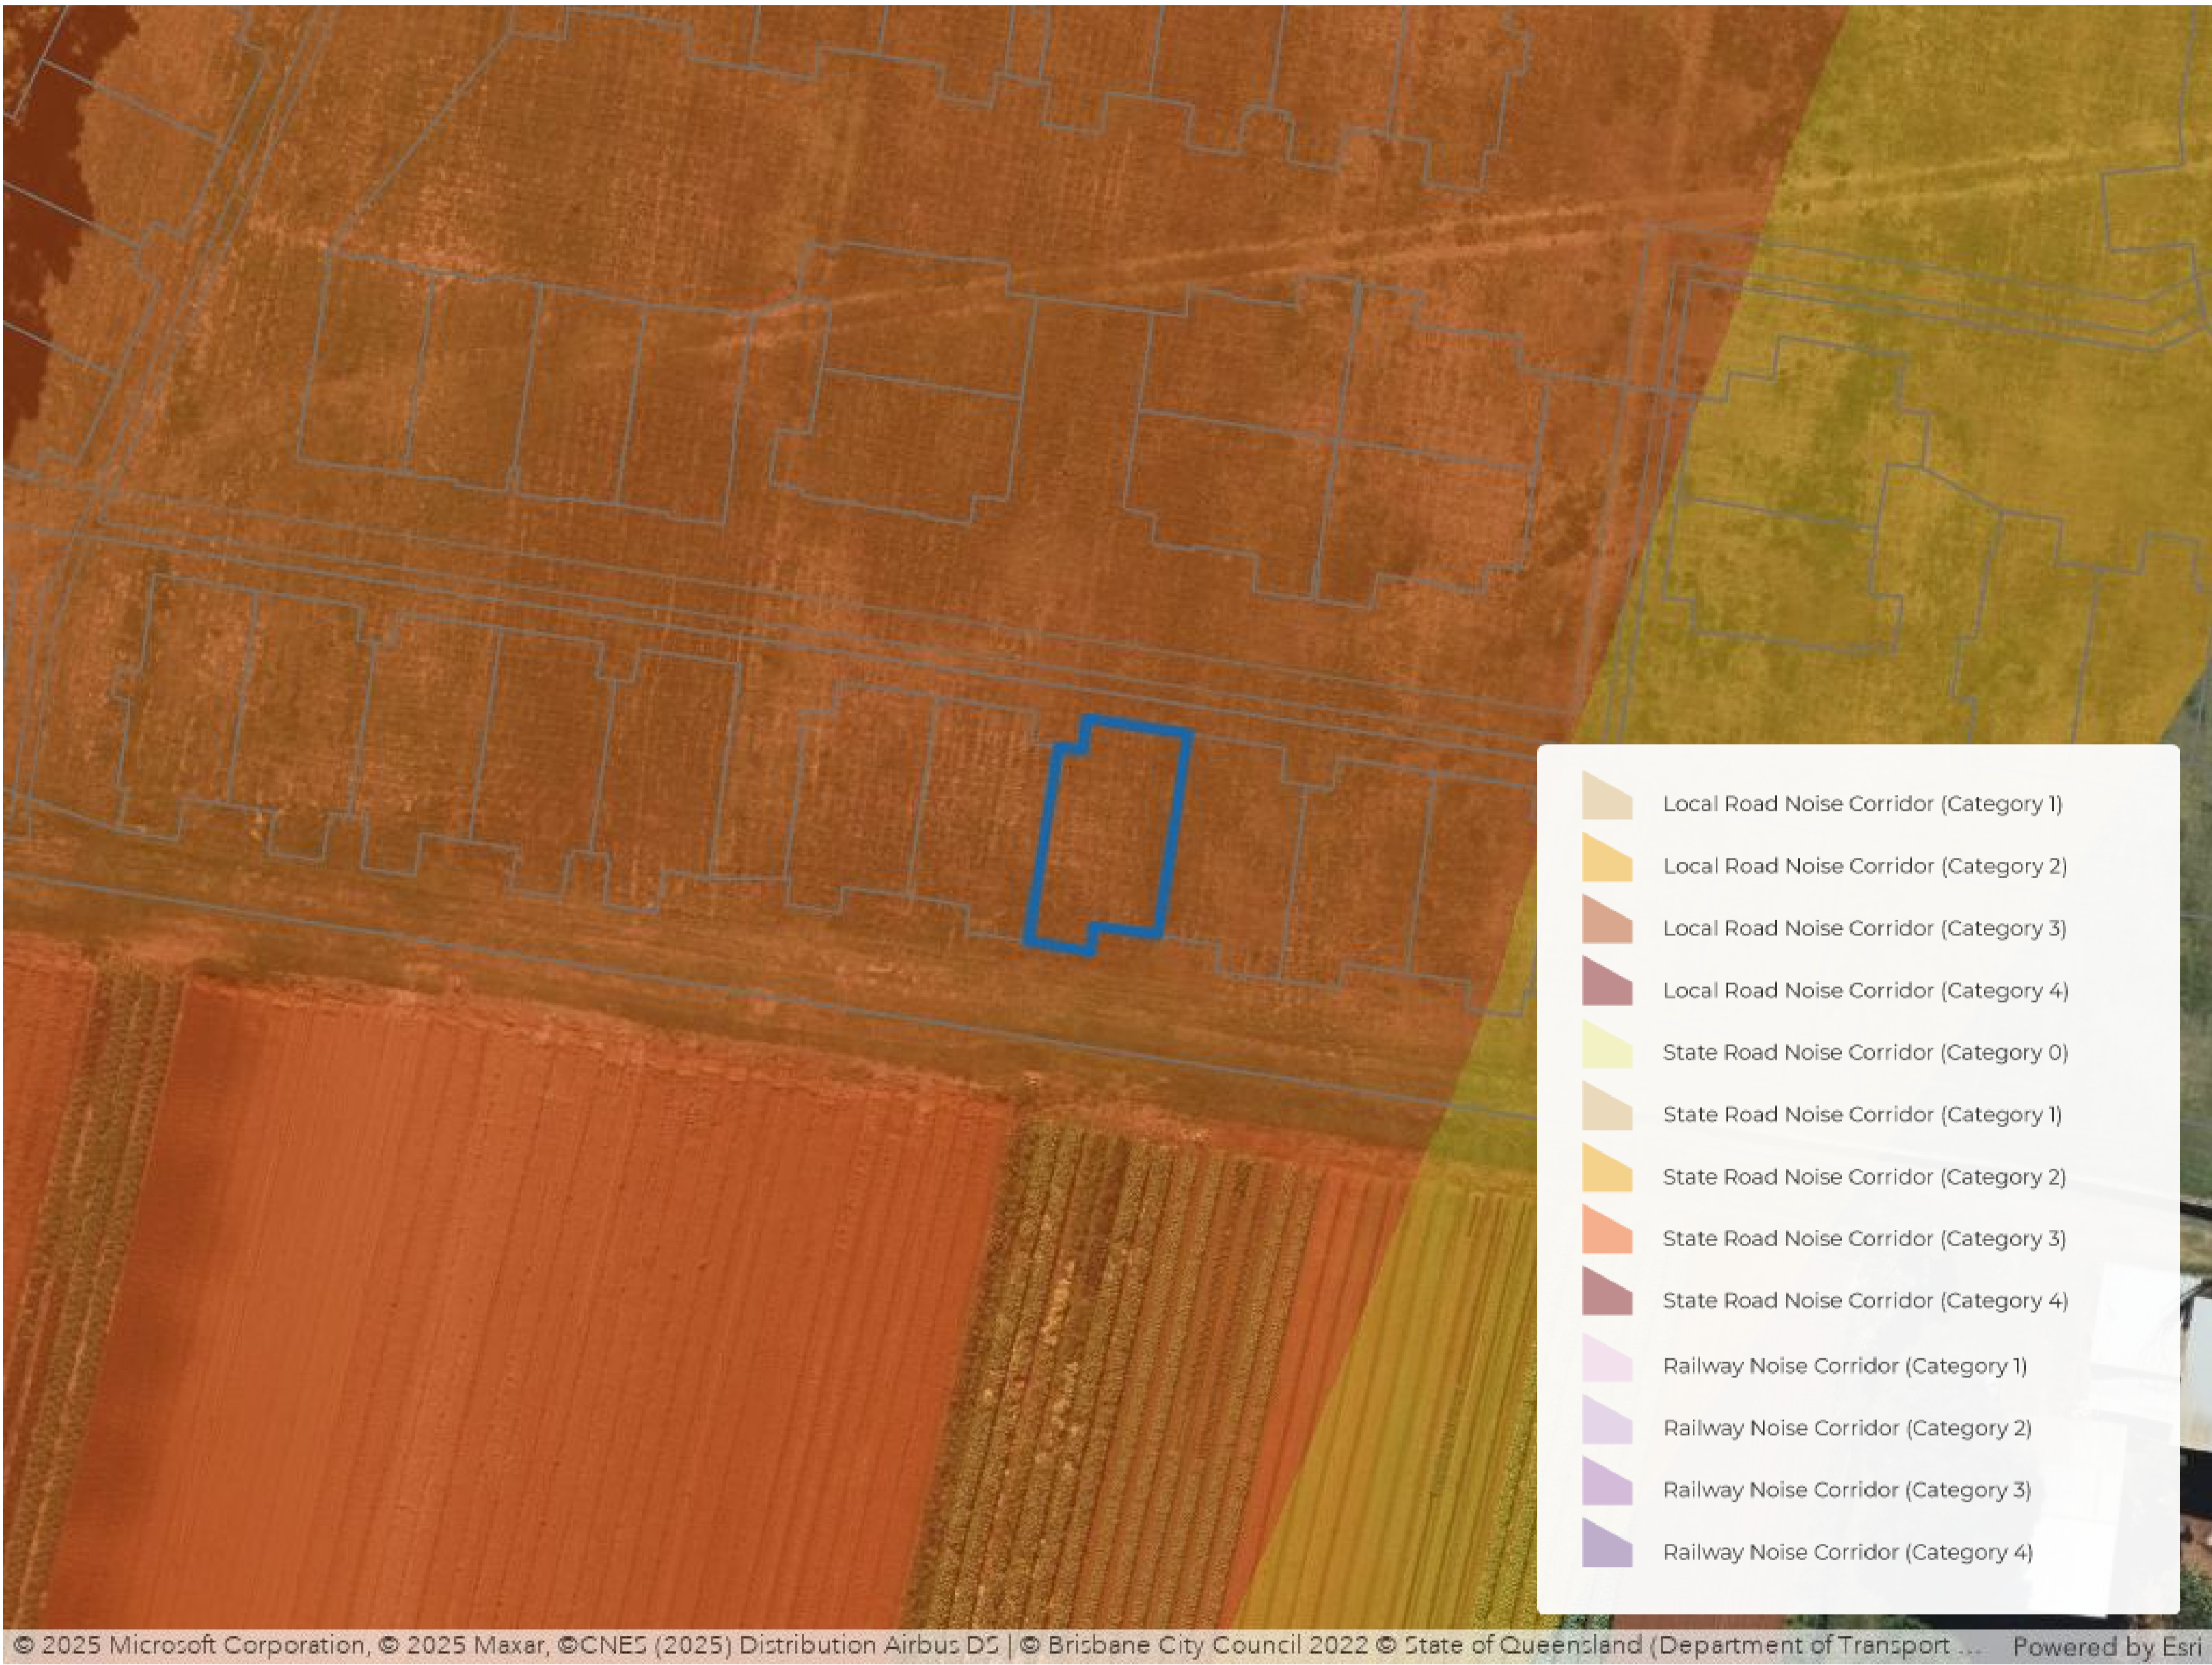

- Is the property located on steep land?
- Is the property susceptible to landslide risk?
- Where is the steep land and/or landslide risk located?
- How does this affect what can be built on the property?
- Can the steep land and/or landslide risk be mitigated?
- How does this consideration impact the property?

Advice from a town planner & a geotechnical engineer is recommended for a property subject to a steep plan or landslide risk.

Noise Impact

YES

Noise impacts have been identified on the property.

What are Noise Impacts?

Noise Impact refers to a designated transport noise corridor, which can be a state-controlled road, major local government road or a railway that has been designated and gazetted by the state or a local government under the Building Act 1975.

There are five noise categories ranging from zero (0) to four (4), which represent the least exposed to transport noise to the most exposed respectively. The categories are based on noise levels at a given distance from the road or rail and are set irrespective of topography or mediating structures such as fences or other houses.

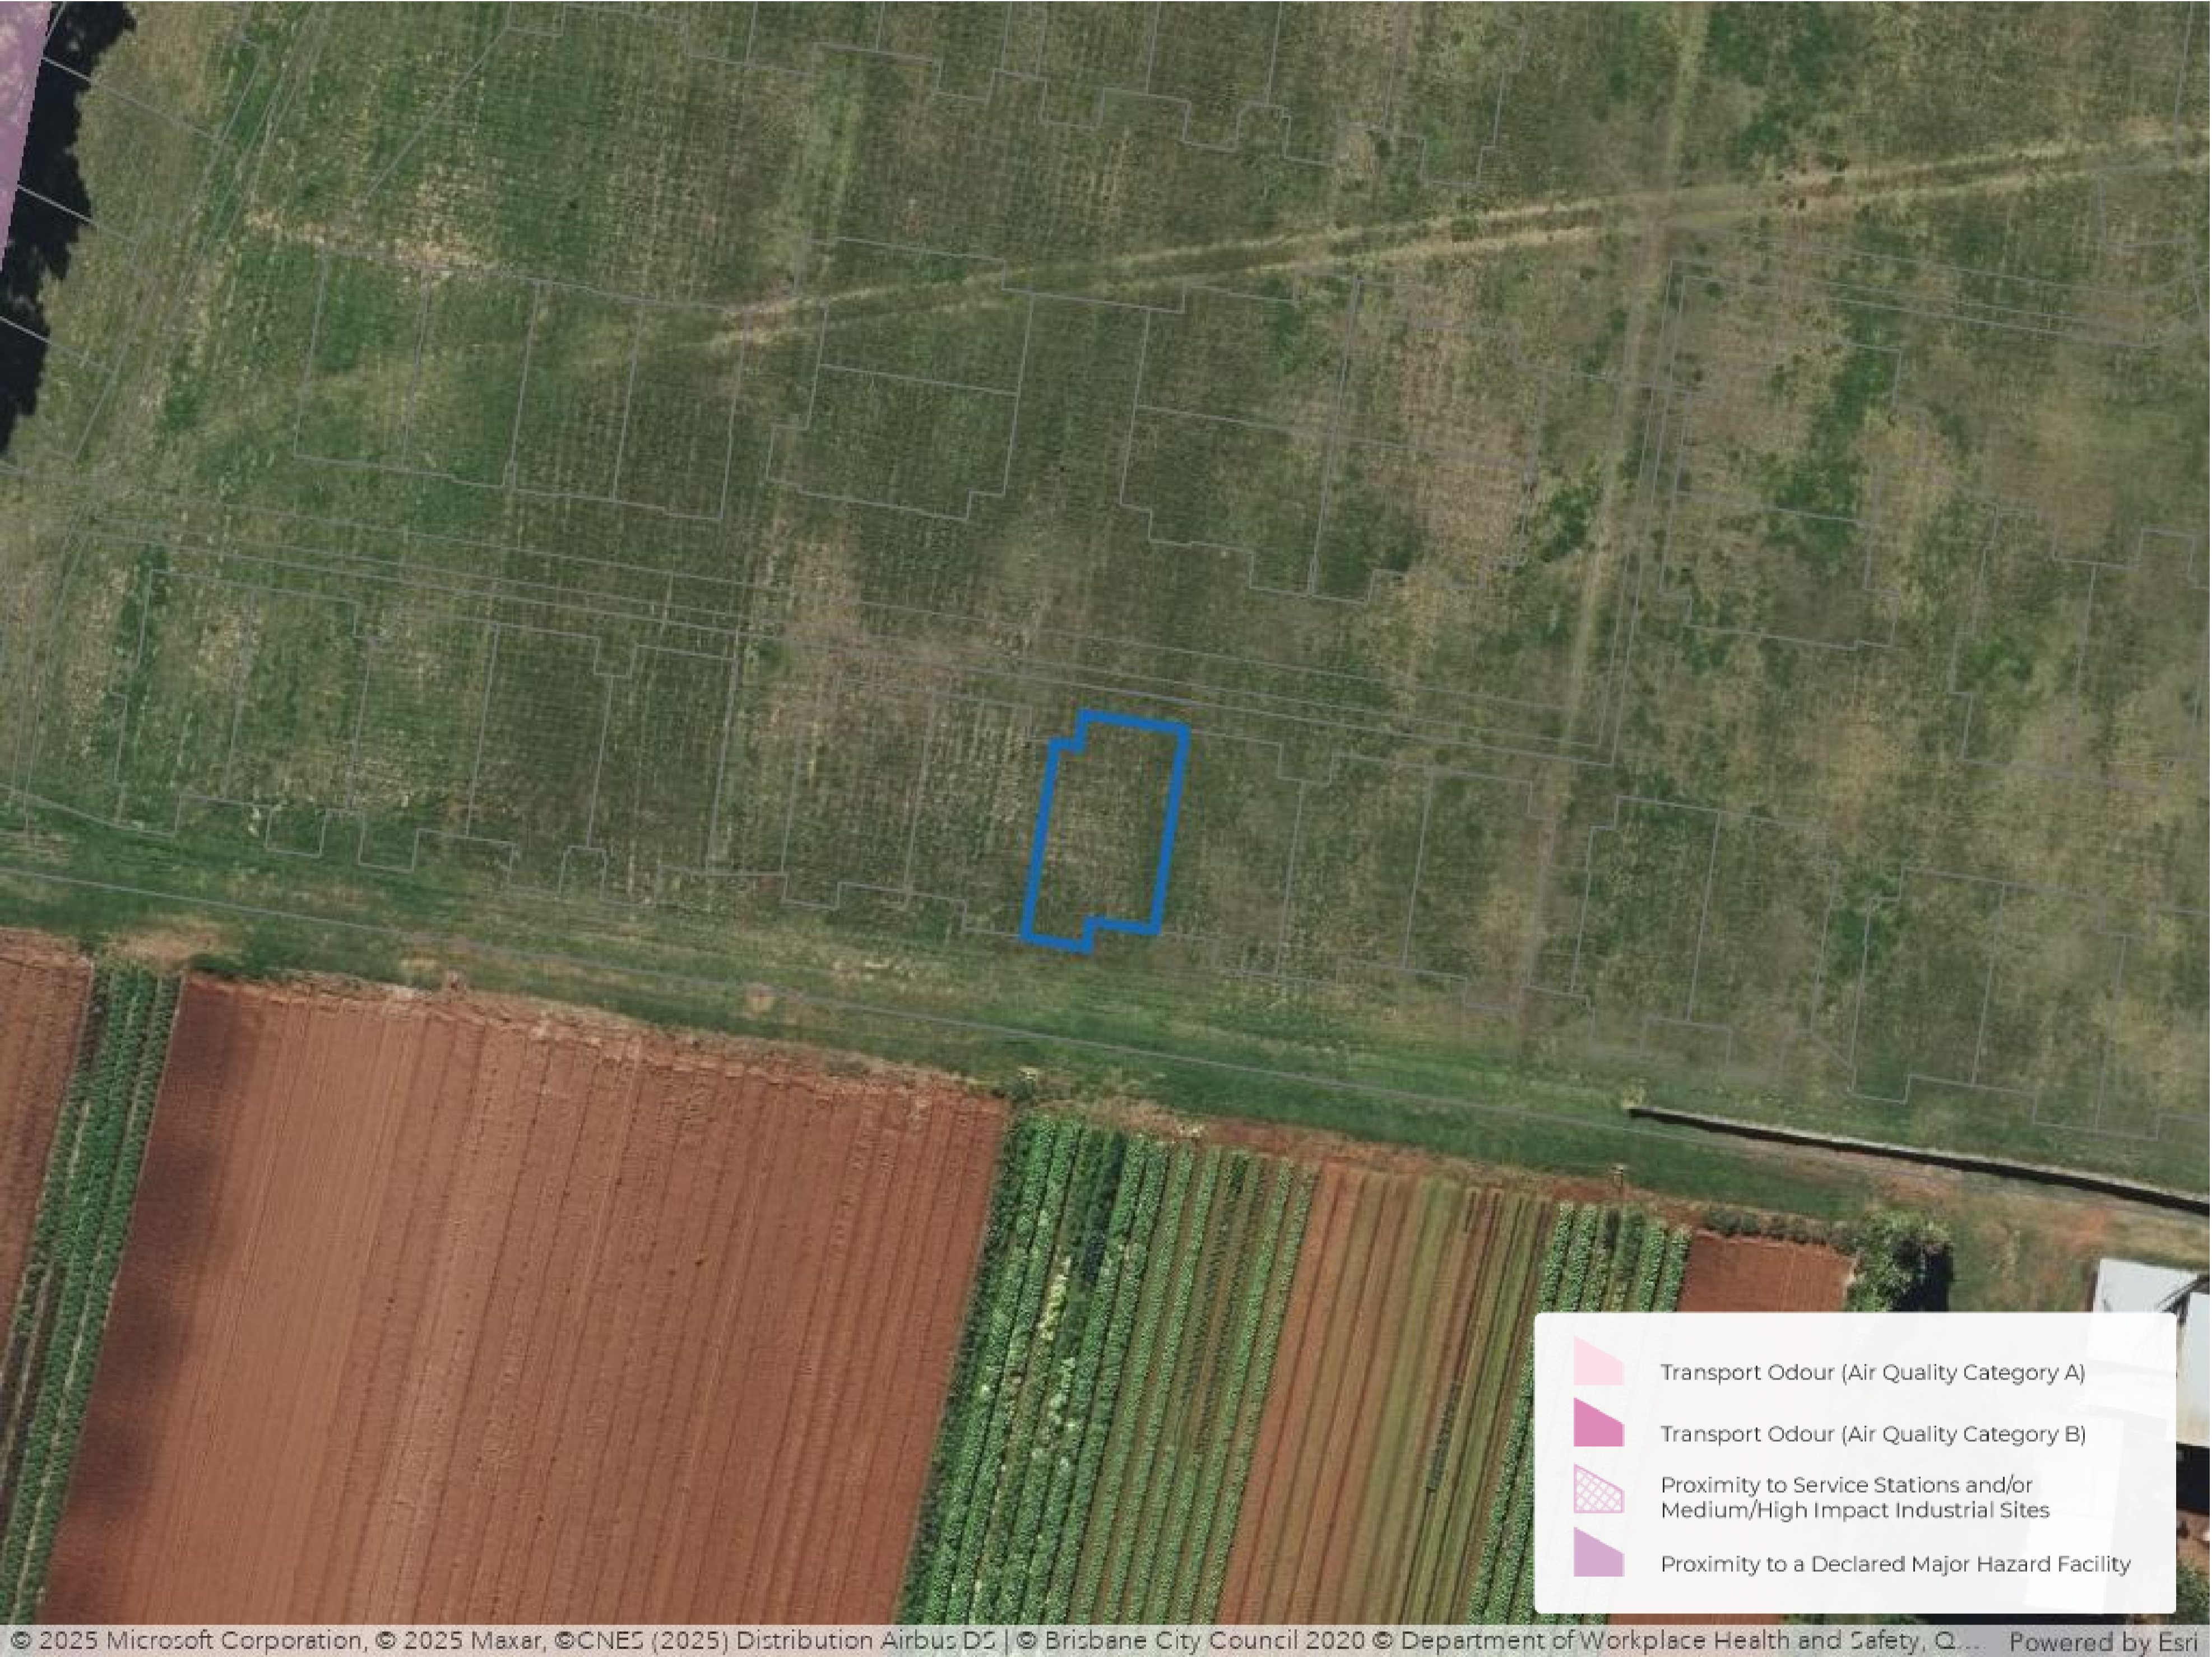

Approval is generally required from a Local Government Authority or a State Government Authority for any building or works within a property affected by noise from a transport noise corridor and/or a railway noise corridor.

Things to Consider:

- Is the property subject to noise impacts?
- What is the source of the noise impacts?
- What is the significance of the noise impacts?
- How do noise impacts affect renovations, extensions or new builds?
- How can noise impacts be mitigated?
- How does this consideration impact the property?

Advice from a town planner & an acoustic engineer is recommended for a property subject to noise impacts.

NO Odour Impacts have not been identified on the property.

What are Odour Impacts?

Odour Impact refers to the air pollution emitted from various sources including transportation, service stations and sewer treatment plants. The severity of the odour impact is relative to the proximity of the odour source(s) to the property.

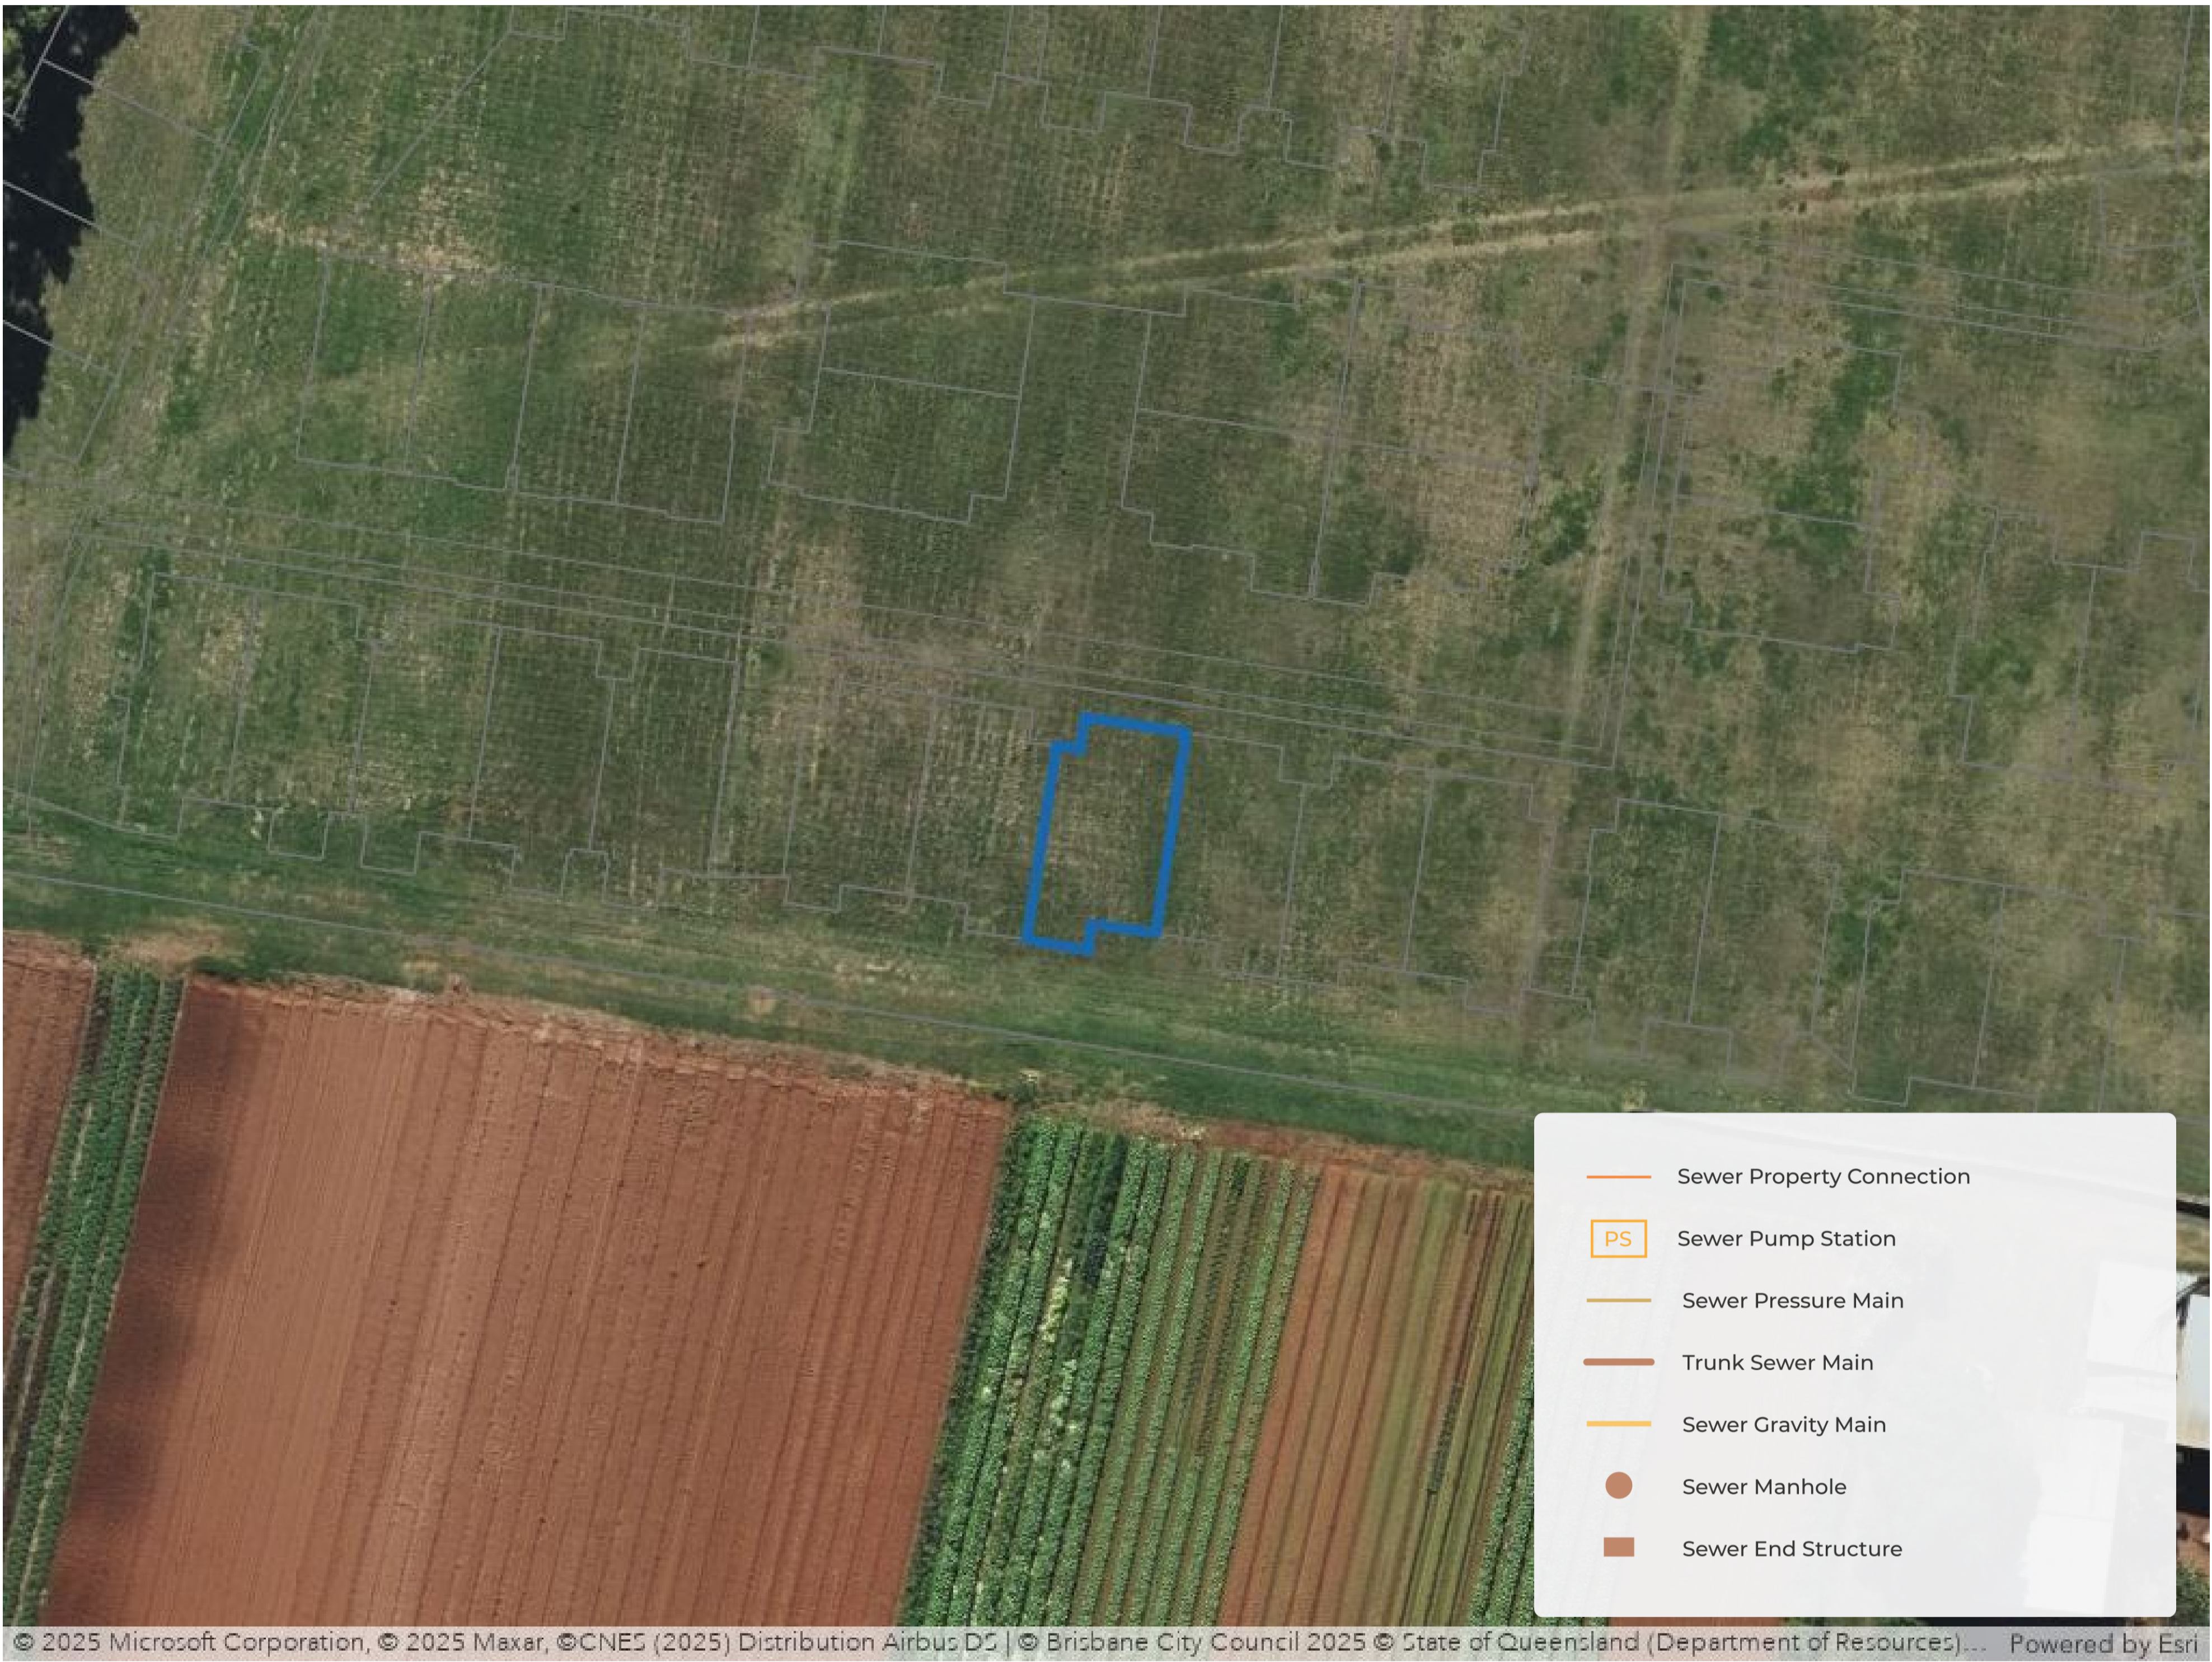

State and local government policies identify buffers to odour sources to protect the health and wellbeing of occupants from the exposure to air pollution emissions. The redevelopment of a property affected by odour impacts, require best practice built form and landscape design elements to maximise wind movement around buildings and the dispersion of air pollutants.

Approval is generally required from a Local Government Authority or a State Government Authority for any building or works within a property affected by odour impacts.

Things to Consider:

- Is the property subject to odour impacts?
- What is the source of the odour impacts?
- What is the significance of the odour impacts?
- How do odour impacts affect renovations, extensions or new builds?
- How can the odour impacts be mitigated?
- How does this consideration impact the property?

 *Advice from a town planner and an environmental engineer is recommended for a property subject to odour impacts.*

NO

Sewer Infrastructure has not been identified on the property.

What is Sewer Infrastructure?

Sewer Infrastructure generally refers to sewer property connections, sewer mains and sewerage treatment plants.

A sewer property connection services an individual property, taking sewerage from the property to the sewer main network. Sewer mains are a network of pipes that transports sewerage to the sewerage treatment plant.

The sewer main network is maintained by local authority and commonly accessed from sewer manholes. A sewer manhole is a sealed chamber attached to a sewer main providing access for the local authority to inspect, test and clear blockages and obstructions in the sewer pipes.

Manholes are fitted with removable covers and must be easily accessible at all times. In some instances, sewer infrastructure may be covered by an easement giving rights to the local authority for access and maintenance.

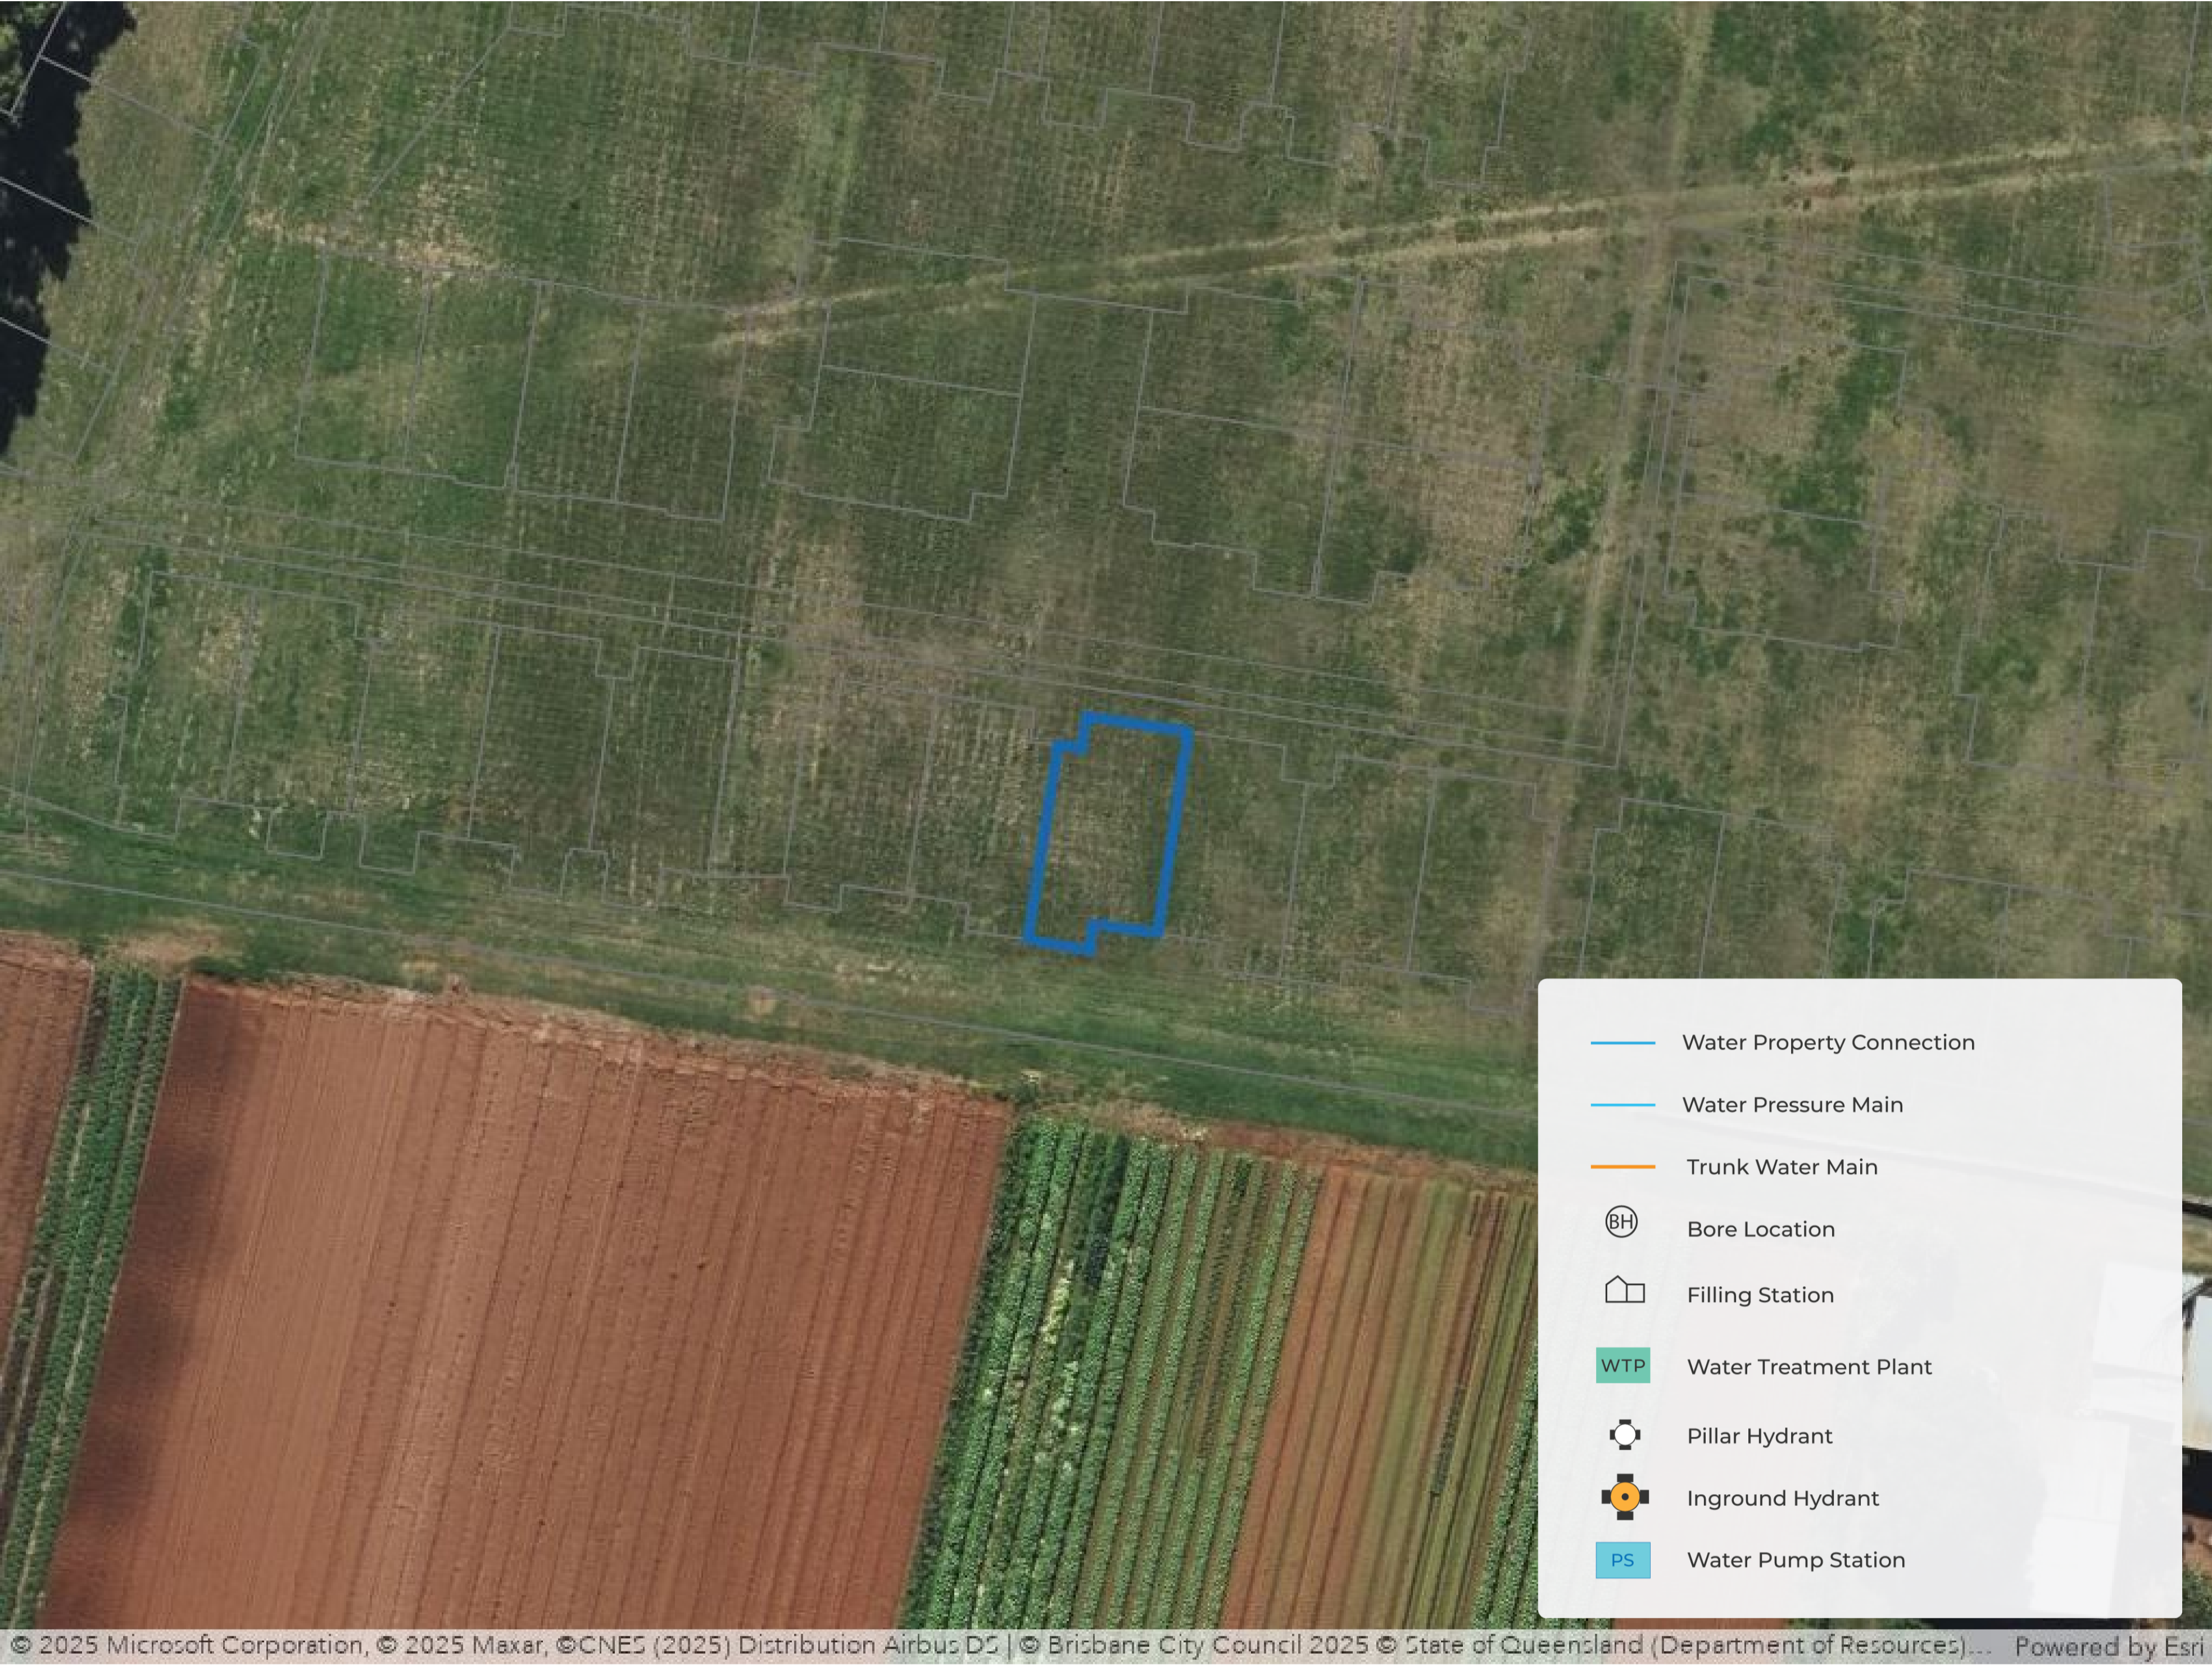

Approval is generally required from a Local Government Authority, State Government Authority or Distributor Retailer for any works to or near sewer infrastructure on a property.

Water Infrastructure generally refers to water property connections, waters mains and water metres. Water infrastructure is commonly known as town water and is a network of water supply that provides running water to households across Australia.

A water property connection services an individual property, providing water supply to the property from the water main network.

Water meters are an essential monitoring tool to record water usage and can also be useful when checking for leaks and diagnosing other supply issues. Water meters are usually located on the Council nature strip outside your property and will be set in the ground in a blue or black box.

In some instances, water infrastructure may be covered by an easement giving rights to the local authority for access and maintenance.
